## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Anderson, US #4,249,318 in view of Ali, US #6,042,151.

3. Anderson teaches a system for displaying multiple packages comprising segmented pie chart 12 (Figure 4) that identifies characteristics of a single entity (paint color) and color codes each segment of the segmented display to differentiate each characteristic (color) from other characteristics of the display and positions multiple packages spaced apart from the segmented display (Figure 7).

4. Anderson does not teach each package further exhibiting at least one of the codes, however, this is well known in the art. Ali teaches a display for multiple packages wherein each package exhibits at least one code, 24 (Figure 1). The codes are numeric and alphabetic. It would have been obvious to a person having ordinary skill in the art to utilize such a code on each package of Anderson so that the packages may be easily arranged on the shelves.

5. Also, the examiner takes official notice of paint tubes that include a place on the label or tube showing what color is in the tube. It would have been obvious to include

such a place (usually a sticker) on the tubes of Anderson so that if the tubes are removed from the display they can be correctly replaced.

6. Anderson and Ali do not teach the single entity as being a pet, however the entity is not part of the claimed invention. It would have been obvious to one of ordinary skill in the art to utilize the system of Anderson (as modified by Ali) when arranging any variety of products.

7. Anderson and Ali do not teach further dividing the subgroups, however this is considered to be duplication of a known part and involves only routine skill in the art. It would have been obvious to one of ordinary skill in the art to provide a system that includes two such arrangements of packages if further separation is necessary.

### ***Response to Arguments***

8. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

9. In response to Applicant's amendment to the claims requiring the packages to be spaced apart from the segmented display, the Anderson reference has been applied.

10. Applicant argues that the invention lends itself to pet products in particular because they are low in cost and have multiple functions. However, many products (including paint tubes) fit this description. As applicant explains, buyers sometimes require explanation for the multiple types of products offered (such as the many shades of what seems to be the same color).

***Conclusion***

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
